

WHY IBOARDTOUCH FOR EDUCATION

Making an informed
decision

WHAT TEACHERS SAY

“The iBoardTouch...it’s the first thing that goes on in the morning and the last thing that goes off before I go home.”

INTERACTIVITY | INNOVATION | COLLABORATION

iBoardTouch...

is a British technology brand that is leading the way in manufacturing complete touchscreen solutions - superb interactive multi-touch screens built to last and software ideal for education.

For teachers used to traditional whiteboard projector systems, one of the benefits you'll notice first is that you no longer need to spend time calibrating, just walk up to the screen and start teaching.

We are also the first manufacturer to offer users transitioning from traditional projector systems the ability to use their existing Smart .notebook and Promethean files with all the layering and animation intact. Engage your students with new technology whilst still using valuable existing resources!

The heart of our solution

iBoardTouch offers you combined hardware and software this means that technical support for the hardware and the software is always handled promptly by a single company.

iBoardTouch
INTERACTIVITY | INNOVATION | COLLABORATION

Our Interactive Whiteboard Software opens all your files...

making it easy to create lesson content

With IWB Pro access your files directly from

Dropbox

Google Drive

Smart Exchange

Classflow
Promethean Planet

Drag them onto the canvas, use IWB Pro's embedded tools, pens and mini apps to enhance your files and create interactive classroom resources.

No need to have the original software installed, IWB Pro does the conversion for you!

IWB PRO

iBoardTouch
INTERACTIVITY | INNOVATION | COLLABORATION

The only software that opens Smart and Promethean files...

a seamless transition to modern, cutting edge touch technology

Open your Smart .notebook and Promethean files with all the layering and animations intact! Reassuringly familiar resources when you need them on your giant tablet (iBoardTouch) on the wall!

IWB Pro also means you don't have to pay subscription fees for Smart or Promethean software. No need to have the original software installed, IWB Pro does the conversion for you!

Why iBoardTouch?

We are highly receptive to customer feedback. We've worked with a number of schools using IWB Pro and DigiClass on software enhancement features and are very proud of being able to offer a software collection that is proprietary, developed in-house with our own team of software developers. This means we can respond rapidly to our customers feedback.

IWB Pro

Exceptional Interactive Whiteboarding Software.

Along with the usual pens, shapes, lines, page colours and tools, use powerful mini apps like **screen recorder** for evidencing, **page replay** to go over concepts just discussed, **board in board** to refer to aims and targets and **desktop mode** to annotate on absolutely any document. Open resource bank and choose content from installed libraries or add your own content quickly and easily. Handwriting recognition, visualisers, maths tools and more, IWB Pro has market leading and comprehensive features. Why not ask for a demo.

DigiClass

Present, Share, Teach Collaborate.

Connect up to 40 iPads, Android tablets or Windows devices wirelessly to the iBoardTouch front of class screen. Collaborate on files together and send files to one another. Making collaboration easy, teachers can forget the technology and focus on what they do best.

DigiVote

A voting panel plugin for DigiClass gives you the option to engage participants in quick votes. Facilitate whole class responses, perfect for engaging students who don't normally speak up. Responses are collated immediately for you to gauge understanding and potentially tailor the rest of the session to cover 'weak' areas.

iFlipChart

As simple to use as a pen, just walk up to your iBoardTouch and start working. A simplified toolbar perfect for anyone who wants to make simple notes and drawings. Specially suited to younger children who can walk up to the iBoardTouch and get started straight away, no orientation required. Pens, shapes, brushes, desktop annotation and resource bank all included!
